

How to Care for Breeches

When the tag recommends hand washing or machine washing, use the following directions:

If washing by hand:

Wash breeches in cool to warm water, with a PePeDe or other breech washing solution, and hang to dry. Keep breeches away from sunlight and heat.

If washing by machine:

Fill machine with cool water. Add PePeDe or other breech washing solution, mix the solution thoroughly. Place breeches in water and start machine. Do not spin dry or wring. Hang to dry away from heat and sunlight.

Some breeches should only be dry cleaned. Read the tags inside the breeches for the best result.
